

Schedule of Blue Cross and CHDP Provider BMI Trainings

As of June 22, 2006

Blue Cross is offering Body Mass Index (BMI) trainings to Blue Cross and CHDP providers throughout California for the next five months; the last month is November 2006. Not every county or health jurisdiction will receive BMI training. In particular, the more rural counties will not receive the training because there are few Blue Cross providers practicing in those areas. However, rural counties who are near the more densely populated counties where trainings will be conducted can notify and invite CHDP providers from nearby rural counties to the training. Below are county locations that are scheduled for BMI training. Exact dates and specific locations are not firm but the month of the training is definite. If you have any questions regarding this schedule or the BMI trainings, please contact Judy Sundquist, MPH, RD, CMS Nutrition Consultant @ (916) 322-8785 or jsundqui@dhs.ca.gov.

Instruction: Please review the months and locations below and determine if your county is scheduled for training or if you are near a scheduled training.

MONTH OF TRAINING	COUNTY/HEALTH JURISDICTION
June	Alameda
	Contra Costa
	Los Angeles
July	San Francisco
	Santa Clara
	Sonoma
